## Projects

Note Pad

Create, save, edit and delete your notes.

June 2025

- Developed a responsive and user-authenticated note-taking web application using the **MERN stack** (MongoDB, Express.js, React.js, Node.js).
- The app allows users to **create, read, update, and delete (CRUD)** personal notes in a secure environment, with real-time UI updates and persistent storage.
- Built scalable backend routes with Express.js and connected to MongoDB using Mongoose for data modeling.
- Tech stack: Frontend ( React.js, Axios, CSS Modules), Backend ( Node.js, Express.js, MongoDB, Mongoose).

Recipe Finder

Sign up, find a recipe or search for one, get the ingredients and instructions, save to favorites, watch the tutorial and log out.

Feb-June 2025

- Designed and implemented a full-stack recipe management platform, featuring a Node.js/Express backend (with Drizzle ORM and PostgreSQL) and a cross-platform mobile app using React Native and Expo.
- Developed RESTful APIs for recipe data, user authentication (Clerk), and favorites management, ensuring secure and efficient data flow between backend and mobile frontend.
- Built a modern, responsive mobile UI with Expo Router, supporting recipe browsing, video tutorials, and real-time favorite syncing.
- Managed both backend and mobile codebases in a unified monorepo, streamlining development, deployment, and maintenance.
